

Dear Assemblymember Powell,

In Harlem, the injustices of NY State prisons are magnified as our community members are disproportionately pulled into the prison system.

So the denial of basic HIV & Hep C care to inmates by DOCS hurts our community. Inmates spend their sentences under substandard prison care. They're denied testing and access to crucial meds, leading to treatment failure and ultimately, death. After release, ex-inmates and their home communities are left to deal with the ravages of unchecked HIV & Hep C, on top of other survival pressures.

DOCS has shown that it is unwilling and unable to provide adequate health care to New York State inmates. DOCS has deepened the AIDS and Hep C crisis and stymied prevention and treatment efforts.

The NYS Assembly Health Committee has planned an upcoming hearing on DOCS health care, and on DOH's responsibility in addressing this public health crisis. We urge you to demand: **HOLD THE HEARING IN HARLEM**, not way downtown and out of reach. Your constituents need a local, accessible chance to hold DOCS & DOH accountable, and to make change.

Sincerely,
